

Year 1 / Summer / Curiosity

Collaboration

We will learn to work co-operatively with different people in our class, sharing and developing ideas together. We will learn to respect the ideas of others and become confident in sharing our own opinions.

Possibilities

As learners we will develop the notion that it is important to try and that if we do not succeed we can learn from the experience and use this learning to help us next time.

The important thing is not to stop questioning. Curiosity has its own reason for existing.
-Albert Einstein

Respect

As friends and peers, we will recognise that everybody is different, socially, racially and academically, and use this knowledge to help us show respect for everybody and everything. We will strive to be good role models

Technology

As children of the computer age we will recognise and begin to understand the significance of computers in our lives. We will use technology in the classroom to develop our learning and share our work.

Article 10

If you and your parents are living in separate countries, you have the right to get back together and live in the same place.

Article 13

You have the right to find out things and say what you think through making art, speaking and writing, unless it breaks the rights of others.
